Profile

Computer Science Undergraduate experienced in Java, Python, Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), and Full Stack Web Development. Developed projects in Cybersecurity, Machine Learning, Web Applications, and Database Systems. Currently preparing for the Japanese Language Proficiency Test (JLPT N5) and interested in software development opportunities within Japanese technology organizations.

Education

- **Anna University, Chennai-25** – Bachelor of Engineering in Computer Science and Engineering (2024 – Present)
CGPA: 7.01 / 10.0
- **Sankar Polytechnic College, Sankar Nagar, Tirunelveli-357** – Diploma in Computer Engineering (2022 – 2024)
CGPA: 9.8/10.0
- **Bell English Matriculation Higher Secondary School, Tirunelveli-2** – Higher Secondary Education (2020 – 2022)
Percentage in HSS: 75.33%

Projects

Proactive Ransomware Defense Using Cyber Deception and Honeyfile Techniques – Technology: Python, Linux, Machine Learning, Random Forest

- Developed a ransomware detection and mitigation system using behavior analysis, honeyfiles, and machine learning techniques.
- Implemented real-time monitoring of file access activities, centralized logging, suspicion scoring, and automated alert generation.
- Integrated Random Forest-based threat prediction, honeyfile-based cyber deception, and Copy-on-Write recovery mechanisms to minimize data loss.
- Built and tested the system in a virtualized Linux environment for early ransomware detection and incident response.

PC Building Website (Full Stack Project) – Technology: MERN

- Developed an e-commerce platform for custom PC builds with simulation-based recommendations and compatibility checks.
- Enhanced user experience by developing intelligent budget-based PC recommendations and real-time performance bottleneck detection.

Smart Traffic Management System (DBMS Project) – Technology: MERN

- Managed real-time traffic signals and congestion monitoring via a centralized web interface with MongoDB integration for signal control and route analysis.
- Implemented real-time data handling, CRUD operations, and schema relationships for efficient database management.

Movie Ticket Reservation System (Mini Project) – Technology: Java

- Developed a ticket booking system with admin controls for managing movies, schedules, and bookings, and user features for seat reservations and history tracking.
- Integrated a database for smooth operations, real-time updates, and improved user experience.

Skills

Programming Languages: C, C++, Java, Python

Web & Database Technologies: HTML, CSS, JavaScript, MERN Stack, MongoDB, Mongoose, SQLite

Core Subjects: DSA, OOP, DBMS, Operating Systems

Languages: Tamil (Native), English (Professional), Japanese (JLPT N5 Candidate)

Soft Skills: Communication, Leadership, Teamwork, Problem Solving
